About This Content

Bunker down and turtle up - it's time for war! This new DLC pack for Stardock's massive RTS features new unique gameplay scenarios and new maps to keep your skirmishes fresh. Prepare your defenses for any punches your enemies throw at you and be ready to launch a devastating counterstrike to seal your victory in Turtle Wars.

Features:

- New Scenarios
 - **Implosion** Race against three enemies to be the first to crack the defenses of a crashed Post-Human and their experimental Turinium Generator.
 - **Eruption** Cut off from your factories, you must command a single Hyperion Dreadnought and a scattering of defensive structures to turn the tides of battle.
 - **Mountaintop** Exploit your resource-heavy advantage and create massive forces to climb the mountain to the enemy entrenchment and wipe them out.
 - **Turtle Wars** Hold off the frigates swarming from indestructible factories and survive the siege. Reprogram the factories to your advantage before the enemy crosses the mountain and finishes you off.
- New Maps

- **Crack the Shell** Hold the high ground and the Turinium against your enemies in this asymmetrical 3-player map, best for 2v1 matches.
- **Turtle Wars** Enjoy a longer duel with your enemy on this epic-scale 2-player map. The open landscape with select chokepoints encourages huge armies and larger battles.
- **Eruption** Choose your path wisely one leads to the lone Turinium Generator, the other to resources in this small 2-player map.
- **Implosion** One valley with an abundance of resources stands at the center of this large, asymmetrical map fit for a 4-player free for all with huge armies.

As good as it gets within the fsx platform, very well done!!! fully functional and it will keep you busy with the myrid of old school warbird engine and flight systems. Id say the best i've seen on STEAM. :). Nice add-on, great detail when flying around Downtown Detroit. Wish it had more realistic surroundings on the outlying airports like Willow Run and Mettetal where I fly. Still glad I bought it.. We don't understand the whole story (I understood like 3%) but the gameplay is in my opinion more than satisfying, a translation into English would do no harm, but overall I'm doing very well on this game. It's a pity that the translation is not there yet because for its price, it's clearly worth the cost.

On comprends pas toute l'histoire (genre j'ai du comprendre 3%) mais le gameplay est selon moi plus que satisfaisant, une trad en anglais ferait pas de mal, mais globalement je m'en sors très bien sur ce jeu. Après c'est dommage qu'elle ne soit pas encore présente car pour son prix, il vaut clairement le coût. Oh my God, this game.

Firstly, it's not written by a Japanese person so don't expect there to be any Japanese text in the options (which is not necessarily bad, just pointing it out).

Secondly, the little girl in here is so freaking sarcastic and apathetic she could easily be diagnosed as a psychopath. It's actually pretty sad because she and her mother treat the father like an idiot (whom they both call an idiot) and he kind of is. Also, gender roles are reversed and though I usually welcome something so refreshing the way this game portrayed it was a little cringeworthy.

The positives? Artwork is adorable and really helps cover up some of the dark\u2665\

It's not too much money if you pick it up on sale. Got it for three bucks. Worth it if you just want to chill with a sadistic game about food and demons and people with demonic tendencies.

But man, the father just really makes me sad...but he's happy...right?

P.S.

The grammar and strange sentence structure in the game was bit of a turnoff.. A decent adventure for an indie game studio. Some riddles were not too obvious and hard to solve, but I'm also not a pro in adventure games. Not fully finished yet, but overall I can recommend it to adventure fans who like this kind of story-setting.. I like the execution of the concept of the game, turning it into 3D with polygons. Simple yet overall great idea.

Suggest change on the color font of the HUD though, with the background already white. I thought the game had no UI.. I think the game looks pretty slick, and according the board game owners, it follows the mechanics and rules of the original board game pretty well, but, to me the dice are just too stacked, and that doesn't model real dice at all. I've tested it a bit in no scientific fashion, but repeatedly the AI gets exactly what it needs on rolls, and my dice consistently do not . . . far more than real dice do in the real world. That is a bit of a deal breaker for me, I'm not saying it's too hard, or that you can't win with enough attempts, but overall I feel the AI had the dice stacked a little too much in its favor.

It's like corruption of champions without the porn.. Once I was able to remember the name of this game thanks to a friend I was able to walk down memory lane with this game. It's so simplistic in the controls and it really makes you think on some levels and it's just so much fun.. Engrossing enough for me to play through the whole thing in basically a single sitting, with an interesting setting that kept me invested to the end. However, most of the roleplaying felt like it had little to no impact on the actual story, and the ending veers straight into Mass Effect 3 levels of choose-your-flavor-of-bad-end garbage.

Had lots of potential but was ultimately disappointing. First game from this developer that I think I've actually disliked.. Honestly the game is subpar, what occurs is that your units have ranges they can operate in, yet they have been given pre determined points of what you can put your units. This means the orcs will be coming at your troops in mass and your idiots won't move to save their own lives, such as an archer will literally be blasting one of your troops in the face, yet he will turn back and go to his dot because he is just slightly out of range. So this is more of a tower defense kind of game yet...not really, you only get a few unit types to work with, they are not imaginative, and only 2 ways to upgrade them, health and strength.

If you want a better game, I would suggest Kingdom Rush. I never normally write reviews (I think this is my first one). I was very excited when I heard this was coming to SteamVR, it sounded like a great experience and bought it straight away. Although the content is great (360 videos and photogrammerty) the application itself is awful, truly one of the worst made VR experience I have ever tried (and I was around in the Oculus DK1 days). So why so bad? Well the interface is clunky and strange to navigate and switching between rendered 3d experiences (such as the photogrammerty) and 360 video is a little strange I could easily put up with this. Its simple, the resolution is awful! Its so bad everything is a pixelated mess. No matter I thought, I'll just modify the supersampling for the app.... nope! when you change the supersampling settings everything becomes way off, the video stretches and warps strangely as you look around and the 3d environment itself seems scaled (no idea why this is). To put it short what could have been an amazing experience has been utterly destroyed by bad programming. I will be getting my money back for this one. When they fix the issues I will happily rebuy it but for now no way!

Edit: I corrected "render scaling" to "supersampling", also to clarify I was not expecting the video resolution to get any better but the photogrammetry, text and controller rendering to be better. Although the video resolution is poor it would be much easier to put up with if everything else were rendered at the correct resolution. Game is hard, almost way too hard. If I could/u2019ve I would/u2019ve definitely destroyed a few controllers by now. But all the hard work you put into dodging and memorizing attacks finishes with an extremely satisfying victory.

9V10 Amazing, but a bit too hard.. Do you like zombies? Yes?..Good! Do you like bowling too? Yes? ..Ok! And do you like little funny games? Yes?..
